

# North Tyneside Local Overview

## Access of Health Services

Those registered with a GP			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
88%		84%	90%

Used a Dentist in the last 6 months			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
58%		35%	32%

Those registered with a Dentist			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
62%		61%	-

Have you used A&E in the last 6 months			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
44%		35%	35%

Used a GP in the last 6 months			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
78%		85%	90%

Admitted to hospital in the last 6 months			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
24%		20%	26%

<b>Homeless Project Provided Health Advice</b>			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
48%		59%	-

<b>Was the advice you received useful?</b>			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
83%		66%	-

prohibitive. Trust is high of GP's, and most often the first contact point for individuals with health issues, nearly all participants had recently been in contact with their local GP.

The number of people using A&E is higher than both the regional and national picture. Respondents reported reasons for using A&E were varied but assault was stated by many. In all 24% people needed to stay in hospital, this was on average for 2 nights.

Homeless Projects was seen as very good in providing health advice (access to posters and pamphlets) with a high number of those surveyed receiving advice for services which was very well received.

The majority of participants were registered with a GP, more so than across the region, but slightly less than the national picture. However, it does represent a high number of respondents being able to access primary health services.

Although registration with a Dentist is reasonably high this doesn't translate through to the use of services as is seen with GP's. In line with the regional picture the cost to access these services, even though minimal to many, this could be very

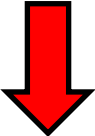

## Physical Health

Do you smoke			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
84%		75%	77%

Do you have dental problems			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
30%		30%	15%

Do you want to stop			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
45%		33%	41%

Do you have chest problems			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
46%		33%	15%

Do you eat two meals a day			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
60%		64%	35%

Do you have joint aches or problems with bones			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
46%		46%	22%

The majority are smokers, with a lot more stating they were compared to the rest of the region, there is a noted desire for people wanting to stop though.

Regionally a high number of people reported eating two meals a day, although this was less for the North Tyneside area it still is a lot better when compared with the national picture. When asked how much fruit and veg they consumed though this limited to 1 – 2 pieces a day with 42% of respondents stating they had some amount of regular fruit and veg. So although the number of those eating two meals a day is encouraging, little is known about the quality and the nutritional benefit.

Three prominent health problems came out of the regional picture;

- Chest Pain/Breathing Problems
- Joint Aches/Problems with bones and muscles
- Dental

While those suffering with either chest pain or dental problems were higher than regional picture, those reporting joint problems were comparable to other areas. Across all areas the use of dentists wasn't high and no doubt explains why this features as a common problem for many.

## Mental Health

Do you often feel stressed			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
84%		69%	73%

Respondents with a formal diagnosis			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
57%		48%	45%

Do you often feel anxious			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
74%		63%	65%

Formal diagnosis for depression			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
65%		82%	36%

Do you feel depressed			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
78%		66%	67%

Received a dual diagnosis			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
17%		30%	12%

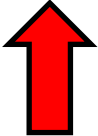

Participants were asked about their own mental health and how they feel, what issues do they experience in their everyday life, or what issues do they feel they have.

Respondents in the North Tyneside area showed less prevalence of mental health issues through self-diagnosis which were highlighted across the region except for depression. In addition 68% of respondents noted having difficulty sleeping.

But there was a higher level of formal diagnosis by a health professional with 57% of individuals receiving a formal diagnosis, in line with the regional picture this was predominately for depression. Nearly all of those with a formal diagnosis were receiving some form of supported.

Overall 80% of people stated they self-medicate to help them with their mental health problems (this includes those not formally diagnosed). A number of individuals had a dual diagnosis, 6 in total, receiving a formal diagnosis for mental health problems also had a drink or drug problem.

## Drugs and Alcohol

Do you take drugs (or recovering from a drug problem)			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
54%		44%	33%

Percentage of drug users getting support			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
68%		62%	44%

Number of people taking legal highs			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
3		16	-

Percentage of people who are weekly drinkers			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
28%		13%	35%

Percentage of cannabis users			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
40%		27%	64%

Percentage of those drinking more than 10 units			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
42%		32%	36%

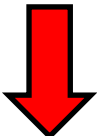

Drug use among respondents was notably higher than the rest of the region. Cannabis was a drug used by many with also prescription drugs being used by a third of people. Although Heroin use was noted 4 people were currently being prescribed methadone.

Along with the rest of the region the use of legal highs was non-existent. Encouragingly over 68% of drug users were getting support to help them either use drugs more safely or eradicate the use of them altogether.

North Tyneside appears to have a considerably larger number of regular drinkers, those drinking more than twice a week, with a significant amount consuming over 10 units when they do drink.

## Vaccinations and Screening

Received a Hep A Vaccination			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
20%		26%	-

Sexual Health Check - Men			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
17%		25%	28%

Received a Hep B Vaccination			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
28%		32%	-

Sexual Health Check - Women			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
50%		46%	50%

Received a Flu Vaccination			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
14%		21%	-

Have you a had a breast examination			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
0%		10%	-

<b>Have you had a cervical smear</b>			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
30%		30%	-

<b>Tested positive for Hep C</b>			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
4%		3%	-

<b>Tested positive for TB</b>			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
0%		2%	-

Those receiving vaccinations for both Hep A, Hep B and Flu were notably lower than the rest of region. Testing in general for Hep C was relatively low for all areas with many not knowing whether they had been tested or not making it hard to get a true picture. With the numbers of those tested being low it is worth noted that 4% people tested positive for Hep C with three of these receiving treatment.

The number of people receiving a sexual health check was below the rest of the region for men but higher for female respondents.

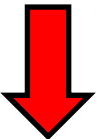

Nearly all those interviewed where knowledgeable where to get advice and support, including contraception, regarding their sexual health. Both GP's and Clinics where seen as the go to for this advice. This further cements the role of the GP as the entrusted health and medical advisor.

## Respondent Profile

Number of respondents			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
35		49	-

Do you have a disability			
<i>N Tyneside</i>		<i>North East</i>	<i>National</i>

### Percentage of Male Respondents

<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
66%		69%	-

### Does your health stop you accessing employment

<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
51%		45%	-

### Percentage of Female Respondents

<i>N Tyneside</i>		<i>North East</i>	<i>National</i>
29%		30%	-

## Age breakdown of respondents

Most survey returns were provided by the following organisations;

- Thirteen Care and Support
- Changing Lives
- DePaul UK
- Northumbria CRC
- NTC Young Parents Scheme

North Tyneside respondents when asked where they were currently staying reported fewer amounts of people staying in the main three reported in the regional audit;

- Hostel
- Rough Sleeping
- Supported Accommodation

It needs to be noted though that 17% of respondents stated other for where they were currently staying; this was largely their own tenancy in other private rented or social housing.
